PVC Pipe Cutter
### PPC-42

Product characteristics:
Apply to cut plastic pipes(such as PVC, PR, PE, PEX).

When cutting PVC flexible pipe you should revolve the pipe whilst compressing.

Scope of cut:
Rigid plastic pipes to a maximum diameter of 3-42 mm.

Method of use as follow:

1.Press to open button with thumb according to the picture1.
2.Put the pipe diameter below3-42mm in cutter, push down handle repeatedly, forthwith cut off.
3.After cutting, clean the blade with rustproof oil. Close the handle for ready use next time.

Attention:
When this product is used in winter, the pipe would be put in lukewarm water for heating at first for a better cutting. Apply to rigid plastics pipe or aluminum plastics pipe, but not applied on electric cable line and steel pipe to avoid to cause damaged seriously. When the blade is not very shark. take down two pieces of fixed screw at two sides of pipe blade to substitute for new pipe blade of the same type.
