Intelligent Security

1. InSTRUCTIONS

WIPCOOL intelligent level controller is designed to solve the problem of condensed water drainage in the working process of dehumidifying equipment or refrigeration equipment. It can automatically cut off the power supply of the equipment through the built-in intelligent chip control, so as to avoid the occurrence of problems such as bubble water of the equipment on the roof of home decoration. Its appearance is exquisite and its wiring is simple, so it is the best companion of drainage pump.

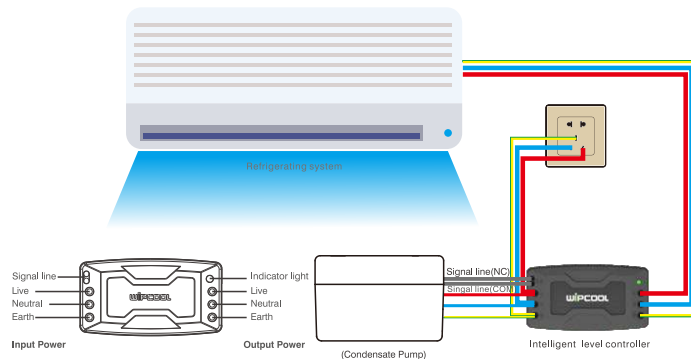

2. Dimensions

3. Technic data

Model	PLC-1
Power(Max.)	3000W
Current(Max.)	16A

4. Installation

- 1, The indicator light is on when the condensate pump is in normal working. The indicator light is off (power cut off) when trigger the level safety switch.
- 2, This product must be connected to the COM and NC signal line on the condensate pump to play an intelligent control role.
- 3, This product is suitable for the refrigeration system which can not use the safety switch of condensate pump because of no liquid level control unit on it.
